Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "cam lock" must be shown or the feature(s) canceled from claim 39. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 37 and 38 are rejected under 35 U.S.C. 102(b) as being anticipated by Stricklin et al.

In regard to claim 37, the Stricklin et al. reference discloses an “adapter” 106 comprising an “upper end portion” 50 and a “lower end portion” 120 capable of being rotated, as claimed.

In regard to claim 38, see column 8, lines 5-10.

Claims 32-35, 37-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Rutter et al.

In regard to claims 32, 33 and 35, the Rutter et al. reference discloses a “bridge” 105 comprising a “top side” 113 and a “bottom side” 121, a “larger open

Art Unit: 3751

section" (defined at top side 113) and a "smaller open section" (defined at port 227), as claimed.

In regard to claim 34, see "hold-down member" 117 and "rotatable collar" 111 in Figure 2.

In regard to claim 37, Rutter et al. further comprise an "adapter" 103 having an "upper end portion" 107 and a "lower end portion" 111 being rotatable to be secured, as claimed. Further, the device is capable of delivering or supplying liquid.

In regard to claim 38, see column 5, lines 49-52.

In regard to claim 39, see column 5, lines 52-56.

In regard to claim 40, "collar" 111 includes a "ridge" 219 protruding outwardly therefrom with respect to the upper portion 201 of "collar" 111, as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 41 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stricklin et al.

Art Unit: 3751

The Stricklin et al. reference discloses the invention substantially as claimed including a "vent" 152, but does not disclose a "plurality" of "vents". However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a plurality of vents in the collar, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Black et al. reference pertains to an adapter having similar structure to that of the Applicant's.

Allowable Subject Matter

Claims 1-31 are allowed.

Claim 36 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
